P55H Electric Start

Puma's new Honda petrol engine-powered air compressors offer a great value solution for on-site or farm use where there's no electric power available.

The genuine Honda GX series engines are renowned for their reliability, easy starting and fuel efficiency, and are covered by Honda's 3-year warranty.

The innovative Puma cast iron, long-stroke compressor pumps are not only durable, but offer class leading free-air-delivery performance.

There's a wide choice of models in either wheel-mounted or foot-mounted configuration and Honda engine ratings from 6.5 to 13 hp.

Specifications

Honda Petrol

Model	Pump Displacement	Free Air Delivery	Maximum Pressure	Pump	Honda Engine		Tank Volume	Outlet Size	Noise Level	Dimensions (cm) & Weight

* Measured per AS 4637-2006. Δ The engine must be connected to a 12 Volt battery (not supplied) to use the electric starter. ^ Measured @ 7 m per AS 2221.1-1979.

Features and Benefits

Puma Hi-Flow Pump

Puma's exclusive long-stroke pump design delivers very high flowrates at low pump speeds. Its full cast iron construction is built tough for reliability and long service life.

12 Volt Battery Kit Option

Make your electric start compressor independent of its host service truck by specifying this option. The kit includes a maintenance free battery, insulated leads and custom engineered bracket.

Honda Petrol Engine

Legendary reliability and advanced performance are guaranteed by the Honda GX engine. Auto-idle throttle control regulates the engine speed to minimize fuel use, noise and wear.

Filter Regulator (P18H & P22H)

The 5 micron filter removes dirt and water effectively from the compressed air stream while the regulator provides accurate pressure control. A Nitto-style coupling is fitted to the air outlet port.

Electric Start

Avoid the strain of rope pull starting by choosing the convenience of an electric start model. Each is fitted with an alternator that can keep the optional 12 Volt battery fully charged.

Puncture Proof Tyres (P18H & P22H)

You'll never be let down by a puncture with these solid rubber tyres mounted on heavy duty steel wheels. The wide tread profile and ball bearing hub allow easy all-terrain handling.
